PROFESSIONAL SUMMARY

Web development and SEO professional with hands-on experience managing corporate websites, technical SEO, website performance, landing-page support, digital campaigns, and web application troubleshooting. Experienced with HTML5, CSS3, JavaScript, Custom PHP, Next.js, React.js, REST APIs, Google Search Console, Google Analytics, Meta Business Suite, domain/hosting/SSL, XML sitemaps, robots.txt, and database support. Currently maintaining three business websites and working across technical and marketing teams.

ROLE ALIGNMENT

Strong match areas: Website Management • Technical SEO • Landing Pages • Google Search Console • GA4/Analytics • XML Sitemap • robots.txt • Page Performance • Mobile Responsiveness • Digital Campaign Support • Meta Business Suite • Web Development

PROFESSIONAL EXPERIENCE

IT Support & Digital Operations Executive | Shahida Obayed Group (SOG)

March 2025 – Present

- Manage and maintain three corporate websites — [sog-bd.com](#), [desihihaat.com](#), and [narayanganjvoice.com](#) — using Custom PHP and Next.js.
- Update website content, landing pages, online information, and business-focused web content.
- Perform technical SEO tasks including metadata optimization, XML sitemap management, robots.txt configuration, image optimization, and search engine indexing support.
- Troubleshoot website issues and support performance, reliability, domain, hosting, and SSL-related operations.
- Support web applications through REST API integration, database management, troubleshooting, and feature enhancements.
- Support marketing teams with website content, landing pages, digital campaigns, and online promotional activities.
- Use Google Search Console and Google Analytics for website visibility, indexing, and performance monitoring.
- Coordinate technical tasks and development activities using Jira and maintain technical documentation.
- Provide basic LAN, Wi-Fi, IP, DNS, DHCP, and internet connectivity troubleshooting as part of wider IT operations.

SELECTED WEB & SEO WORK

Corporate Website Management | [Custom PHP](#) • [Next.js](#)

Managed multiple corporate websites, including content updates, technical troubleshooting, performance optimization, indexing support, XML sitemap, robots.txt, and technical SEO improvements.
